

REMARKS

Claims 5-7 and 11-17 are pending in the present application.

Claims 5-7 are allowed.

Claims 1-4 and 8-10 are canceled with this Amendment.

Claim 5 is amended to correct an error. The term "intensities" in line 3 is corrected to "powers". The difference in the two terms is discussed below.

Claims 11-17 are new. Support in the specification for new claims 11-17 are found at page 3, lines 26-30, page 4, lines 7-14 and lines 18-20, page 14, lines 21-22, page 19, lines 9-24, and page 20, lines 1-15.

The specification is amended to correct the term "intensity" to the term "power". The expression "mW" or "W" is well known in the art as an expression for a unit of power called watts, not intensity. Enclosed with the present Preliminary Amendment is an Information Disclosure Statement with a photocopy of the relevant pages from Grant & Hackh's *Chemical Dictionary*, fifth edition. Page 469 of the dictionary clearly shows that a watt is a unit of power, not intensity. Power is the time rate of doing work (joules/second), while intensity is the strength or amount of energy per unit space, area or time. See page 306 of the dictionary for the definition of intensity. The measurements were made in mW or milliwatts. See page 5, lines 23-24 of the specification. Accordingly, no new matter is added.

Claim 9 was objected to because it was of improper dependent form. Claim 9 is canceled. Accordingly, this objection is moot.

Claims 1-4 and 8-10 were rejected under 35 U.S.C. §102(b) as allegedly anticipated by U.S. 3,652,275 to Baum et al.

Claims 1-4 and 8-10 are canceled. Accordingly, this rejection is moot.

Favorable consideration and allowance of claims 5-7 and 11-17 are earnestly solicited.

U.S.S.N. 10/773,991

Filed: 02/06/2004
